Research Opportunities Database

Research Opportunities Database

Welcome

Welcome to the Medical Sciences Division Research Opportunities database. We hope that this online platform will enable greater collaboration between clinicians/PIs and medical students in Years 4-6 looking to participate in research at clinical school, and thereby facilitate high-quality translational research.

We would be grateful for [your feedback on using the database](#). If you have any problems using the database, please [email MSD Learning Technologies](#).

Instructions for Students

Students wishing to participate in a research can view available projects using the "Research Opportunities Database" link above. If you are interested in a particular project, please contact the clinician or PI directly using the contact details provided.

Instructions for PIs/Project Creators

Please [contact MSD Learning Technologies](#) to request permission to create projects within the database. (If you can see edit/delete/add icons on the right hand side of this page, you already have this permission, so just use the link above to go to the database and create your projects).

Please [refer to the Editors' Guide](#) for information on creating and editing projects.
